Interests

Painting & Sketching **Photography**

Designing **Book Reading**

Key Projects

1. Legal Self Rep

Technology Used: Backend -> Spring Boot, Frontend -> React JS, DB -> MySQL

Period: Jan 2016 - Nov 2016

Description: Project is based on processing Legal Documents of Canada. It includes form for following Legal documents:

- Agreements
- Divorce
- Child Custody
- Child Support
- Spousal Support

Role & Responsibility:

- To develop Frontend In JS - development of legal forms
- Handling States Using Redux (with middleware Thunk)
- JWT authentication
- Handling States Using Redux (with middleware Thunk)
- Strip Payment Gateway Integration

Challenging Part: Manipulation of Forms

2. Toripal TV

Technology Used: Backend -> Node JS (Express JS), Frontend -> React JS, DB -> MongoDB

Period: Dec 2016 - Jul 2017

Description: Project is online video streaming platform where users can stream their live videos including online chat. Video Posting systems with like, comment, share functionality.

Role & Responsibility:

- API development in Node JS using Express JS
- JWT authentication
- Social Media Authentication
- Handling States Using Redux (with middleware Thunk)
- Frontend Development
 - User Profile Management
 - User Video Social Media (Posting, like, comment)

3. Loan Management Portal

Technology Used: Backend -> Spring Boot, Frontend -> React JS, DB -> MySQL

Period: Aug 2017 - Feb 2018

Description: Project is a management system for Loan Company where every employee can manage their records for their leads. It includes - Admin, Team-Lead, Employee Portals with their respective functionality for lead sheet uploads, assigning leads, search leads, employee management, etc

Role & Responsibility: To develop Frontend In JS

- Admin Portal - Frontend
- Team Lead Portal - Frontend
- Employee Portal - Frontend
- Frontend Development of Event Website using Bootstrap
- Handling States Using Redux (with middleware Thunk)

4. VOE - Virtual Online Event

Technology Used: Backend -> Node JS (Express JS), Frontend -> React JS, DB -> MongoDB

Period: Mar 2018 - Sep 2018

Description: Project is a management system for Virtual Online Event. Where users can create their online events which leads to creation of websites for the event. Anyone can come on a specific event website and get enrolled in the event. Website contains features like Schedule listing, chat with speakers, schedule meet with speakers. Event based Posts, Like, Comment.

Role & Responsibility:

- API Creation in Node JS using Express JS
- Frontend Development Admin panel to manage users using Bootstrap
- Frontend Development of User Panel to manage events using Bootstrap
- Frontend Development of Event Website using Bootstrap
- Handling States Using Redux (with middleware Thunk)

5. Raizly

Technology Used: CodeIgnitor-> PHP , Frontend -> React JS (Tailwind), Typescript

Period: Oct 2018 - Apr 2019

Description: Project is based on Fund Raising. Including functionality like Event Creation and Management by

Organiser. Also It includes ecommerce to raise funds by selling products.

Role & Responsibility:

- Frontend Development Admin panel to manage events
- Frontend Development using Tailwind CSS
- Authentication functionality by managing JWT Tokens in cookies
- Form Handling using React form Hook
- Handling States Using Redux (with middleware Thunk)

6. Learn Beyond Schooling

Technology Used: React JS (Bootstrap), NextJs

Period: May 2019 - Oct 2019

Description: Project is based on e-learning which provides various courses.

Role & Responsibility:

- Frontend Development Admin panel to manage courses
- Frontend Development for website using Bootstrap
- Managing components based on SEO (meta tags, server side rendering)
- Form Handling using React form Hook
- Handling States Using Redux (with middleware Thunk)
- UI/UX Design in Figma

7. Stroied

Technology Used: React JS, Next JS, Redux, Tailwind CSS

Period: Nov 2019 - Apr 2020

Description: Project is based on a social media platform to add personal story history.

Role & Responsibility:

- Frontend Development - UI development
- Frontend Development API integration

8. SAWO

Technology Used: React JS, Redux, Tailwind CSS

Period: May 2020 - Oct 2020

Description: Project is based on a social media platform to add personal story history.

Role & Responsibility:

- Frontend Development - UI development
- Frontend Development API integration

9. Atlas

Technology Used: React JS, Redux, Tailwind CSS, Mirco-frontend architecture

Period: Nov 2020 - Apr 2021

Description: Project is based on Company Users management (HR portal)

Role & Responsibility:

- Frontend Development - UI development
- Frontend Development API integration
- UI/UX Design in Figma

10. Noon.com (Robosoft)

Technology Used: React JS, Redux, Tailwind CSS

Period: May 2021 - Oct 2021

Description: Project is based on E-Commerece platform. It includes the internal user management and vendor management portal, where all the verifications and the data of user/cendor kept.

Role & Responsibility:

- Frontend Development - UI development
- Frontend Development API integration

11. wowway.com

Technology Used: NextJS, React JS, Redux, Tailwind CSS, AWS Dynamo DB

Period: Nov 2021 - Apr 2022

Description: Project is based on HR Management Portal.

Role & Responsibility:

- Frontend Development - UI development
- Frontend Development API integration
- Node Js REST API Creation

12. Shotflow.io

Technology Used: React JS, Next Js Redux, Tailwind CSS, Node JS, Express JS, mongodb, AWS EC2

Period: May 2022 - Oct 2022

Description: Project is based on Real Estate video shoot booking and management.

Role & Responsibility:

- Frontend Development - UI development
- Frontend Development API integration

- Node Js REST API Creation
- UI/UX Design in Figma

13. Somnoware

Technology Used: React JS, Redux, Tailwind CSS, Node JS, Express JS, MySQL

Period: Nov 2022 - Apr 2023

Description: Project is based in the healthcare sector.

Role & Responsibility:

- Frontend Development - UI development
- Frontend Development API integration
- Node Js REST API Creation

14. Sunwing

Technology Used: React JS, Redux, SCSS, Material UI

Period: May 2023 - Jul 2023

Description: Project is based on Travel based services

Role & Responsibility:

- Frontend Development - UI development
- Frontend Development API integration
- UI/UX Design in Figma

15. SavATree

Technology Used: NextJS, Redux, Tailwind CSS, Node JS, Express JS, mongodb, AWS EC2

Period: Aug 2023 - Oct 2023

Description: Project is based on Plants based services

Role & Responsibility:

- Frontend Development - UI development
- Frontend Development API integration
- Node Js REST API Creation
- UI/UX Design in Figma

16. Artworkflow (Bizongo)

Technology Used: React JS, Redux, Tailwind CSS, Node JS, Express JS, mongodb

Period: Nov 2023 - Jan 2024

Description: Project is based on a creative management system..

Role & Responsibility:

- Frontend Development - UI development
- Frontend Development API integration
- Node Js REST API Creation

17. Neighbourly

Technology Used: React JS, Redux, Tailwind CSS

Period: Jan 2024 - Jan 2024

Description: Services provider platform

Role & Responsibility:

- Frontend Development - UI development
- Frontend Development API integration

18. NCR Voyix

Technology Used: React JS, Redux, Tailwind CSS

Period: Feb 2024 - Mar 2024

Description: Services provider platform.

Role & Responsibility:

- Frontend Development - UI development
- Frontend Development API integration

19. Sustainology

Technology Used: React JS, Redux, Tailwind CSS, Mongo db, Next Js, Node Js

Period: Mar 2024 - April 2024

Description: Services provider platform

Role & Responsibility:

- Frontend Development - UI development
- Frontend Development API integration
- API creation in node js

20. Austin & Blake

Technology Used: React JS, Redux, Tailwind CSS, Mongo db, Next Js

Period: April 2024 - Present

Description: Services provider platform

Role & Responsibility:

- Frontend Development - UI development
- Frontend Development API integration
- API creation in node js
